

Martin® Trac-Mount™ Idlers

Martin® Trac-Mount™ Idlers utilize sliding frames on a stationary base to provide an idler set that will fit in tight spaces between belt support cradles and allows easy installation and service. Trac-Mount™ Idlers are available with standard or wide base frames and utilize impact or steel rolls in CEMA class C, D, or E.

BENEFITS

- **Allows Close Spacing**
Slide-in frames need only eight inches (203 mm) of width for 6-inch (152 mm) rolls.
- **Improves System Serviceability**
Slide-out/slide-in roller frames allows idler service without need to raise belt or remove adjacent idlers.
- **Prevents Fugitive Material**
Trac-Mount™ Idlers provide proper belt carriage while they stabilize the belt line to improve sealing.
- **PPI or PROK Rolls Now Standard**
Assemblies are supplied with steel or impact rolls from Precision Pulley and Idler or PROK.
