

Martin® X-Stand

AIR CANNON X-STAND ONLY
P/N A50009T-XXXL-H*

AIR CANNON X-STAND AND HURRICANE AIR CANNON

AIR CANNON X-STAND AND TYPHOON AIR CANNON

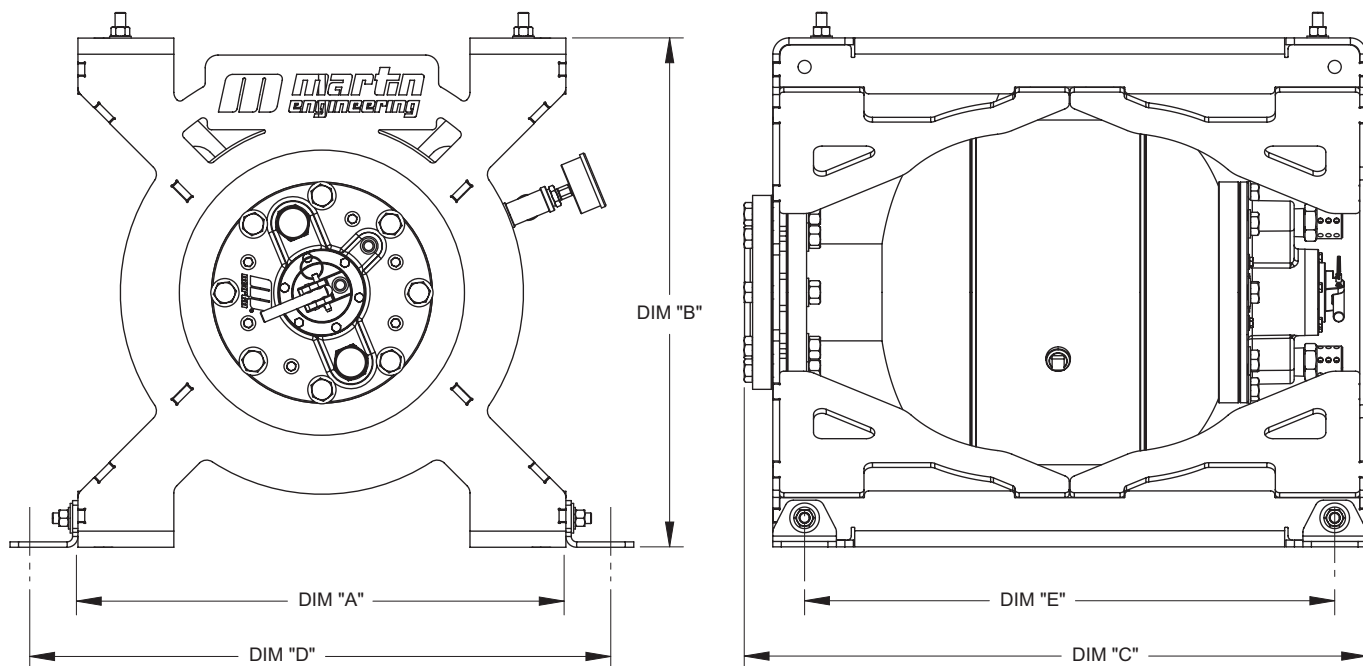

*XXX indicates tank size (in Liter) ie. 035, 070, 150

The **X-Stand** was designed to provide a sturdy, reliable, and secure mounting solution for air cannons. It gives customers the flexibility to mount cannons onto a safe, stable structure while maintaining all the performance benefits of air cannon technology.

Key Advantages of the X-Stand

- Improved Safety & Versatility**
 The X Stand allows cannons to be positioned away from extreme heat zones or hard to reach areas, making maintenance and operation safer and more accessible.
- Replaces Multi Port Systems**
 With strategic placement, an X Stand can perform the function of multi port cannon setups, simplifying the system and reducing installation complexity.
- Supports Hard Pipe Connections**
 The stand enables the use of hard piping instead of flexible hose, increasing durability, reducing wear, and aligning with best practice installation standards.
- One Port / One Cannon Compliance**
 The X Stand fully supports our installation protocol of one port per cannon, ensuring optimal air flow and maximum performance.
- Flexible Configuration Options**
 Multiple X Stands can be arranged in stacked vertical or horizontal configurations, offering adaptable solutions for a variety of applications.
- Compatible With Safety & Nozzle Accessories**
 The X Stand can be used together with the **Thermo Safety Shield** and a wide range of nozzle designs, providing additional protection and customizing the cannon's performance to the application.
