**COMPANY
PROFILE**

WE ARE GLOBAL LEADERS.

Since 1944, Martin Engineering has been and continues to be the worldwide leader in the bulk materials handling industry. We are the premier international developer, manufacturer, and supplier of products and technologies to boost material flow, reduce dust and spillage, decrease downtime, and extend component life resulting in improved operation and greater profitability.

Martin Engineering is headquartered in the United States with products, sales, service, and training available from 18 factory-owned facilities worldwide. With business units, subsidiaries, licensees, and representatives in Argentina, Australia, Brazil, Chile, China, Colombia, France, Germany, India, Indonesia, Italy, Japan, Kazakhstan, Malaysia, Mexico, Peru, Russia, Spain, South Africa, Turkey, the United States, and the United Kingdom, Martin has established a network of global excellence.

Our global resources and standardized processes, combined with 80 years of real-world experience, uniquely position us to provide trusted and reliable solutions to common problems faced in the industries of bulk material handling.

THE BEST RESULTS BEGIN WITH THE BEST PEOPLE.

Martin Engineering's focus is a strong dedication to our people. Great emphasis is placed on providing a positive and productive company culture for those who make our business possible and treating them like family. We are committed to operating in a smart, sustainable, and compassionate way to better improve how we serve our employees, customers, and communities around the globe. Living according to our purpose statement results in both personal and professional success for each Martin employee and the customers and communities we serve.

80 YEARS OF EXCELLENCE WORLDWIDE

Our local team together with Labor Hire insures quality service and efficiency in all our operations and activities around Australia, and even in the most remote places.

EXCELLENCE IS OUR LEGACY.

Martin Engineering has the solutions and expertise to make your operation cleaner, safer, and more productive. We offer conveyor and flow aid products to optimize material handling. Martin Service Technicians offer field services to optimize your operation's performance and profitability for both new construction and established systems.

BELT CLEANERS

Martin® Belt Cleaning Systems minimize carryback, reduce emergency outages and maintenance expenses, and maximize equipment life, resulting in cleaner, safer, and more productive conveyor systems.

TRANSFER POINTS

Proper design of Transfer Point with solutions improves material handling by preventing spillage and airborne dust, reducing equipment damage and cleanup, controlling maintenance expenses, and enhancing plant safety and productivity.

AIR CANNONS

A powerful release of compressed air, effectively dislodging buildups to enhance material flow and improve efficiency, thereby maintaining profitability. With a range of cannons and accessories, Martin offers models tailored to suit your specific application needs.

NEW TECHNOLOGY

The Remote Monitoring System tracks your scrapers and blades in real-time, remotely monitoring the lifespan of your blades, knowing the ideal moment to replace or re-tension them

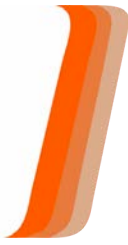

VIBRATION

Energize material, reducing friction against chute walls and internal particle-to-particle cohesion. This results in materials moving more freely, feeding more effectively, sorting more consistently, compacting more efficiently, and handling more easily.

FOUNDATIONS™

Foundations™ Books are the go-to resource for mastering belt conveyor operations, offering a real-world approach for efficient bulk materials handling. Tailored for personnel at all levels, it serves as the basis for Foundations™ Training, an opportunity to maximize workforce performance and optimize your most crucial asset – your people.

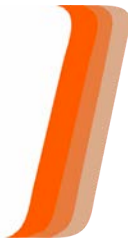

Our solutions are designed to excel in diverse environments and applications, including heavy-duty settings. We prioritize robust design and advanced technology to ensure that our solutions not only meet but exceed the challenges posed by rigorous environments, enhancing efficiency, safety, and productivity across all sectors.

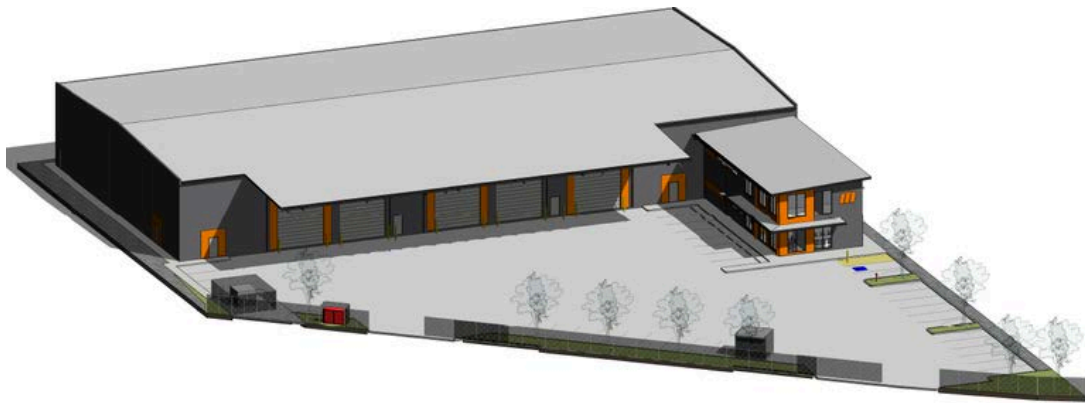

**WE HELP A WIDE RANGE OF
INDUSTRIES AND APPLICATIONS,
OFFERING TAILORED SOLUTIONS
TO MEET DIVERSE NEEDS
ACROSS SECTORS.**

OUR AUSTRALIAN UNIT

Our head office is based in Gold Coast QLD, where we are inaugurating our new manufacturing and operations facility, more than 2400 square meters of manufacturing capability are available for our customer needs. A new Branch is being established in Perth WA, with local stock, manufacturing and maintenance capability as its main focus.

ONGOING SERVICES

We currently maintain service contracts, including a major belt cleaner service agreement with Vale spanning several years and global locations.

These partnerships demonstrate our commitment to delivering high-quality, customized solutions that enhance operational efficiency in mining and material handling industries.

OUR CURRENT PROJECTS

COMPANY	INDUSTRY	MARTIN'S SOLUTIONS
Karara	Mining - Iron Ore	Multiple Cleanscrape® supply and installation
MRL Crushing Services International (Iron Valley)	Mining - Iron Ore	Multiple Cleanscrape® supply and installation
MRL Crushing Services International (Mt Marion)	Mining - Lithium	Multiple Cleanscrape® supply and installation
MRL Crushing Services International (Utah Point)	Mining/Port - Iron Ore	Multiple Air Cannon supply and installation
BGC Naval Base	Cement	Multiple Vibrators supply and installation
Rio Tinto (Mesa A)	Mining - Iron Ore	Air Cannon supply and installation
Talison Lithium	Mining - Lithium	Air Cannon supply and installation
St. Barbara Limited	Mining - Gold	Multiple Cleanscrape® supply and installation
Polaris Metals Pty Ltd (Pilbara Ports)	Mining/Port - Iron Ore	Air Cannon supply and installation
Boral	Construction/Cement	Air Cannon supply and installation
Cement Australia Railton	Cement	Air Cannon supply and installation
Vale Malaysia	Mining - Iron Ore	Long term conveyor service contract
Cockburn Cement	Cement	Multi-sites Air Cannon supply and installation
Citi Pacific (Sino)	Mining - Iron Ore	Cleanscrape® supply and Project Management
Cape Preston Port Company Pty Ltd (Sino Iron Project)	Mining/Port - Iron Ore	Cleanscrape® and belt cleaner supply and installation

SAFETY AS A CORE VALUE.

INSURANCE

Martin Engineering fully insured with a Public and Products Liability coverage of \$20,000,000.00.

Additionally, we maintain comprehensive worker's compensation policies for our employees in Queensland (QLD) and Western Australia (WA). This ensures that we are well-prepared to manage any unforeseen incidents, providing peace of mind to our clients and safeguarding the well-being of our workforce.

OUR SAFETY SYSTEM

- Drug and Alcohol Management Procedure
- Environmental Policy
- Fatigue Management Procedure
- Health and Safety Policy
- Isolation and Tagging Procedure
