

CleanScrape® Cleaners

The [CleanScrape® Cleaner](#) is mounted diagonally on the discharge pulley and forms a three-dimensional curve. The cleaner has a matrix of carbide scrapers incorporated into the main rubber body during the vulcanization process. Despite a relatively low contact pressure between the belt and cleaner 85 to 95% of the adhering material is removed.

FEATURES & BENEFITS

- Simple installation, minimum space required
- Low wear to the belt and cleaner
- Blade completely corrosion resistant
- Suitable for use with all types of mechanical joints
- Low maintenance
- Available with stainless steel installation kits
- Suitable for use in explosive atmospheres
- Suitable for use with reversing belts
