

Martin® DT2S Reversing Cleaner

Combining the best features of two successful Martin Engineering Secondary Cleaners, the [Martin® DT2S Reversing Cleaner](#) features a split-track blade cartridge that slides in and out on a stainless steel mandrel. This unique engineering makes for a fast and easy service procedure to reduce conveyor downtime.

BENEFITS

- Removes Carryback, Saves Cleanup**
 Effective belt cleaning reduces plant clean-up chores, and prolongs life of conveying equipment.
- 5-Minute Blade Change**
 Blades slide into split-frame cartridge; cartridge slides into cleaning position on stainless steel mandrel.
- Minimizes Service Time**
 Slide-in/slide-out blade cartridge allows quick and easy blade service that minimizes conveyor downtime. Even when the cleaner is encrusted with material, one-half of the split frame can be removed to allow blade change. With on-site safety approvals, blades can be changed while the belt runs.
- Installs in Small Places**
 Lean profile minimizes space requirements, allows installation in spaces as narrow as seven inches (178 mm).
- Suitable for Reversing Belts**
 Can be installed on conveyors that roll back or run in two directions.

Martin® DT2S REPLACEMENT BLADES

Martin® DT2S Reversing Blade	P/N
Tungsten Carbide	31104 - T
Urethane	31104 - U
Stainless Steel	31104 - S
Mild Steel	31104 - M
Tungsten Carbide with Stainless Steel Holder	31104 - TCS

TECHNICAL DATA SHEET

* Metric belt widths are given as standard industry belt sizes rather than conversions.

DIMENSIONS – in. (mm)

Belt Width* in. (mm)	No. of Blades	Blade Coverage in. (mm)	Max. Mainframe Length in. (mm)	Weight w/o Tensioner lb (kg)	Assembly P/N with Tensioner**
