BENEFITS

- **Fast Blade Change Cuts Service Expense**
One-pin blade replacement makes blade replacement a fast and easy operation.
- **Matched Tensioner Maintains Consistent Cleaning**
Martin® QC1™ Cleaner XHD and Spring Tensioner are system-engineered to preserve the cleaning edge from high belt speeds and multiple splices.
- **Curved Blade Provides Consistent Cleaning**
Patented “CARP” (Constant Angle Radial Pressure) design maintains cleaning performance through all stages of blade life.
- **Rugged Construction Suits Tough Conditions**
Mainframe of rugged 3/8-in. (9.5-mm) thick DOM steel tubing has steel bar backbone. Aluminum extrusion in blade base holds cleaner snugly to backbone.
- **Blade Materials Match Application**
Martin Engineering’s urethane expertise provides blades to suit standard, high-temperature, or high-abrasion conditions.
- **The Most Cleaner, the Least Investment**
Economical pre-cleaner and tensioner system combines effective cleaning, durable life, and low-maintenance requirements.

NOTES

Martin® QC1™ Cleaners XHD are available for belts up to 120 in. (3048 mm) wide. For belts wider than 72 in. (2000 mm) a dual-blade assembly is required.

Normal blade length is belt width less 6 in. (150 mm). For belts with a 45° trough or where material is centered on belt, customer should consider a blade that is belt width less 12 in. (300 mm). This is because belt edges may not require cleaning, and blade-to-belt friction in these areas may lead to premature wear of cleaner and/or belt.

Martin® QC1™ Cleaner XHD will mount into existing Martin® DT1 Cleaner XHD locations. Martin® QC1™ Blades XHD will NOT fit onto Martin® DT1 Mainframe XHD.

Example #1: P/N 35899-481042T is a belt cleaner for a 48-in. wide belt, with segments, standard orange urethane blade. Blade coverage is belt width minus 6 in., with a Spring Tensioner XHD.

Example #2: P/N 35899-601148BR is a belt cleaner for a 60-in. wide belt, with solid brown urethane blade that is 48 in. Blade coverage is belt width minus 12 in., with no tensioner included.

FREQUENTLY ASKED QUESTIONS

My Pre-Cleaner keeps flipping through. What is wrong?
The mounting location may be too far away from the belt. Relocate to the proper mounting location. Replace the mainframe or end weldments if they are bent. Check set screws to determine if they are tight. Retighten if necessary.

My Pre-Cleaner is wearing more in the center of the blade.
The blade is too wide for this application. Replace with a shorter length blade.
