

Martin® SHD Cleaner

Martin® SHD Cleaner with Spring Link Tensioner

Built for the widest, fastest, most heavily-loaded belts in the world, including yours....

Advanced Engineering and Formidable Construction Mean Effective Cleaning, Low Maintenance, and Long Life, Even Under the World's Most Punishing Conditions.

The [Martin® SHD Cleaner](#) was developed for effective belt cleaning with minimal maintenance and extended wear life. The Martin® SHD Cleaner has been proven on belts up to 120 in. (3000 mm) wide and speeds up to 1500 fpm (7.5 m/sec), carrying loads up to 300,000 tons per day. For consistent cleaning and long maintenance intervals, the Martin® SHD Cleaner is right for your conditions.

BENEFITS

- Massive Blades**
 Blades are thick and robust to resist abuse and dissipate heat for extended wear life. Martin® SHD 1200 blades provide up to 12 in. (305 mm) of wearable material; Martin® SHD 600 blades provide 10.5 in. (207 mm).
- Martin® CARP Constant Angle Blade Design**
 Means continuous effective cleaning across all stages of blade life.
- Structural Steel Beam Construction**
 No more bent mainframes, even with high tonnages and large lumps.
- System Engineering**
 Design of cleaner and tensioner as one unit means constant, effective cleaning with reduced service requirements.
- Reduced Maintenance**
 No need for re-tensioning or cleaner adjustment for the life of the blade, which reduces labor costs and downtime.
- Urethane Options**
 Choose blades from Standard (Orange) or High-Performance (Brown) Urethane. Both materials are MSHA-accepted (IC-95/6) for use in underground mining.
- Guaranteed Blade Life**
 Martin Engineering urethane technology and manufacturing options guarantee service life. The cost of replacement blades will be prorated if guaranteed life is not achieved. To determine the Guaranteed Wear Life for a specific application, see your Martin Engineering representative.

TECHNICAL DATA SHEET

APPLICATION GUIDELINES

The Martin® SHD Cleaner is designed for high-speed, high-tonnage conveyors with large diameter head pulleys. It can be applied on any conveyor with a head pulley larger than 24 in. (600 mm) in diameter with sufficient room in the chute to mount the cleaner.

Blade Height

To achieve constant angle geometry to match pulley diameter, blades are available in two heights. Use 1200 Series Martin® SHD Blades for pulleys 48 in. (1200 mm) in diameter and larger. Specify 600 Series Martin® SHD Blades for pulleys smaller than 48 in. (1200 mm) in diameter.

NOMENCLATURE
