Important

MARTIN ENGINEERING HEREBY DISCLAIMS ANY LIABILITY FOR: DAMAGE DUE TO CONTAMINATION OF THE MATERIAL; USER'S FAILURE TO INSPECT, MAINTAIN AND TAKE REASONABLE CARE OF THE EQUIPMENT; INJURIES OR DAMAGE RESULTING FROM USE OR APPLICATION OF THIS PRODUCT CONTRARY TO INSTRUCTIONS AND SPECIFICATIONS CONTAINED HEREIN. MARTIN ENGINEERING'S LIABILITY SHALL BE LIMITED TO REPAIR OR REPLACEMENT OF EQUIPMENT SHOWN TO BE DEFECTIVE.

Observe all safety rules given herein along with owner and Government standards and regulations. Know and understand lockout/tagout procedures as defined by American National Standards Institute (ANSI) z244.1-1982, *American National Standard for Personnel Protection - Lockout/Tagout of Energy Sources - Minimum Safety Requirements* and Occupational Safety and Health Administration (OSHA) Federal Register, Part IV, 29 CFR Part 1910, *Control of Hazardous Energy Source (Lockout/Tagout); Final Rule*.

The following symbols may be used in this manual:

Danger: Immediate hazards that will result in severe personal injury or death.

Warning: Hazards or unsafe practices that could result in personal injury.

Caution: Hazards or unsafe practices that could result in product or property damages.

Important: Instructions that must be followed to ensure proper installation/operation of equipment.

Note: General statements to assist the reader.

Introduction

General

Martin® Washbox™ Cleaning Systems are designed for use in applications where the conveyor belt must be very clean. As the belt enters the Martin® Washbox™ Cleaning System, a set of return idlers stabilizes the belt. The spray bar uniformly sprays the belt with water before the first belt cleaner removes most of the material from the belt. A second belt cleaner then removes the remaining material and dries the belt. The material cleaned from the belt can be pumped back onto the belt or drained into the plant sump.

The water in the system can be substituted with anti-freeze or dust-suppressant chemicals. Martin Engineering recommends using a pre-cleaner with the Martin® Washbox™ Cleaning System for maximum efficiency.

Appendix A provides Martin® Washbox™ Cleaning System dimensions and water consumption.

Safety

All safety rules defined in the above documents and all owner/employer safety rules must be strictly followed when working on the equipment.

Materials required

In addition to standard hand tools, the following special tools are required to install and service this equipment:

- Pipe wrench to fit 4-in. NPT pipe.

Before Installing Belt Cleaning System

IMPORTANT

The delivery service is responsible for damage occurring in transit. Martin Engineering CANNOT enter claims for damages. Contact your transportation agent for more information.

1. Inspect shipping container for damage. Report damage to delivery service immediately and fill out delivery service's claim form. Keep any damaged goods subject to examination.
2. Remove Martin® Washbox™ Cleaning System from shipping container.
3. If anything is missing or damaged, contact Martin Engineering or a representative.

WARNING

Before installing or servicing equipment, turn off and lock out/tag out energy source to conveyor and conveyor accessories.

4. Turn off and lock out/tag out energy source according to ANSI standards (see "References").

WARNING

If equipment will be installed in an enclosed area, gas level or dust content must be tested before using a cutting torch or welding. Using a cutting torch or welding in an area with gas or dust may cause an explosion.

5. If using a cutting torch or welding, test atmosphere for gas level or dust content. Cover conveyor belt with fire retardant cover.

IMPORTANT

Do not install Martin® Washbox™ Cleaning System at a slope greater than 15 degrees. Contact Martin Engineering when a slope greater than 15 degrees is required.

Installing Belt Cleaning System

IMPORTANT

Customer must supply and install a return idler directly before Martin® Washbox™ Cleaning System to ensure correct belt alignment for proper operation of washbox.

NOTE

The side of the Martin® Washbox™ Cleaning System that the spray bar connection is located on is referred to as the “operator side.” The other side is referred to as the “far side.”

1. Determine location of Martin® Washbox™ Cleaning System. Make sure system is located on return side of belt where belt runs flat.

2. Remove two idler rolls (A) as follows:
 - a. Remove cap screws (D), washers (C) and tie tabs (B) from roll bracket on operator side and farside.
 - b. Remove rolls (A) from washbox.
3. Install washbox on conveyor structure in pre-determined location.
 - a. Using a hoist or crane, lift washbox into position.
 - b. Position washbox so belt cleaner mainframe centers are 7-1/2 in. below belt line.
 - c. Cut or drill four 3/4-in. mounting holes in stringers.
 - d. Mount washbox to stringers (E) through four hanger bracket weldments using cap screws, washers, and nuts (F).

4. Reinstall two idler rolls (A) above cleaner mainframes as follows:
 - a. Slide idler rolls in above belt, making sure belt is between rolls and cleaner blades. Position rolls so they do not change belt line.
 - b. Install tie tabs (B), washers (C), and cap screws (D).
5. Make sure idler rolls above and below belt are snug against belt.
6. Install belt cleaners and tensioners according to applicable operator's manuals.

IMPORTANT

Martin Engineering recommends installing water regulator and ball valves on water line to isolate spray bars and regulate water pressure to Martin® Washbox™ Cleaning System. If your water supply contains particles larger than 300 microns, install filter on water line.

7. Connect water supply to 3/4-in. hose barb (G).
8. Connect plant discharge pipe to 4-in. NPT discharge pipe nipple (H).

After Installing Belt Cleaning System

1. Thoroughly wipe outside chute walls clean above Martin® Washbox™ Cleaning System on both sides of chute. Place Conveyor Products Warning Label (P/N 23395) on chute walls visible to belt cleaner operator.
2. Make sure all connections and bolts are tight.
3. Start conveyor belt. Follow procedures in applicable belt cleaner operator's manual.

IMPORTANT

Top spray bar is to wet belt only; it should not be used to wash or blast material from belt.

4. Start water flow. Adjust water flow and top spray bar to wet entire belt width. (See Appendix A for required water consumption.)
5. Direct lower spray bar toward bottom of washbox to flush material cleaned off belt toward discharge.
6. When spray bars are positioned properly, tighten spray bar clamps on each spray bar.
7. Operate conveyor belt and Martin® Washbox™ Cleaning System for one hour.
8. Inspect and adjust belt cleaners and tensioners according to applicable operator's manuals.

Maintenance

1. Maintain belt cleaners and tensioners according to applicable belt cleaner operator's manual.
2. Wash out Martin® Washbox™ Cleaning System weekly until amount of buildup is determined, then wash as needed.
3. Every 6 months, check spray nozzles for clogs. If nozzles are clogged, remove and clean.
4. Wipe Conveyor Products Warning Labels clean. If label(s) is not readable, contact Martin Engineering or representative for replacement.

Part Numbers

This section provides product names and corresponding part numbers for the Martin® Washbox™ Cleaning System. Please reference part numbers when ordering parts.

**Martin®
Washbox™
Cleaning System**

P/N WB X XX X XX X X X XX X X See Figure 1.
 1 2 3 4 5 6 7 8 9 10

P/N WBSC X XX X XX X X W See Figure 2.
 1 2 3 4 5 6

1. The first X indicates material.
 P = Powder Coated Steel
 S = Stainless Steel
2. The next XX indicates belt width.
3. The next X indicates first belt cleaner type:
 A = WSQC2S-XXXXXXXXXX cleaner
 B = WSQC2S-XXXXXXXX3XX cleaner
 C = WH2OS-XXXXXXXXXX cleaner
 0 = No cleaner
4. The next XX indicates first cleaner blade width.
5. The next X indicates first cleaner blade type:
 C = WSQC2S with SC-XXC & Rubber Buffer
 R = WSQC2S with SC-XXR Orange Blade & Rubber Buffer
 T = WSQC2S-XXXXXXXX3XX with Tungsten Carbide Blade
 U = WSQC2S-XXXXXXXX3XX & WH2OS with Urethane Blade
 0 = No Blade
6. The next X indicates the first cleaner blade color:
 B = Brown Blade (WSQC2S-XXXXXXXX3XX)
 G = Green Blade (WSQC2S-XXXXXXXX3XX)
 N = Navy Blue (WSQC2S-XXXXXXXX3XX)
 O = Orange Blade (WSQC2S-XXXXXXXX3XX &
 WSQC2S-XXXXXXXXXX)
 T = Teal Blade (WH2OS)
 0 = No Blade
7. The next X indicates second belt cleaner type:
 A = WSQC2S-XXXXXXXXXX cleaner
 B = WSQC2S-XXXXXXXX3XX cleaner
 C = WH2OS-XXXXXXXXXX cleaner
 0 = No cleaner
8. The next XX indicates second cleaner blade width.

9. The next X indicates second cleaner blade type:
 - C = WSQC2S with SC-XXC & Rubber Buffer
 - R = WSQC2S with SC-XXR Orange Blade & Rubber Buffer
 - T = WSQC2S-XXXXXX3XX with Tungsten Carbide Blade
 - U = WSQC2S-XXXXXX3XX & WH2OS with Urethane Blade
 - 0 = No Blade
10. The next X indicates the second cleaner blade color:
 - B = Brown Blade (WSQC2S-XXXXXX3XX)
 - G = Green Blade (WSQC2S-XXXXXX3XX)
 - N = Navy Blue (WSQC2S-XXXXXX3XX)
 - O = Orange Blade (WSQC2S-XXXXXX3XX & WSQC2S-XXXXXXXXXX)
 - T = Teal Blade (WH2OS)
 - 0 = No Blade

Problem Solved™ GUARANTEED!

For nearly 30 years, Martin Engineering's Foundations™ Books have taught industry personnel to operate and maintain clean and safe belt conveyors. The Foundations™ Book, fourth edition, focuses on improving belt conveyors by controlling fugitive material. "The Practical Resource for Total Dust and Material Control," is a 576-page hard cover volume that provides information of value to industries where the efficient handling of bulk materials is a key to productivity and profitability.

Expanding upon the book, our Foundations™ Training Program addresses the design and development of more productive belt conveyors, and is offered in three customizable seminars. Attendees gain a better understanding of conveyor safety and performance, helping to justify upgrade investments and increase profitability.
