

COUGAR® TRUCK VIBRATORS

MOBILE VIBRATION SOLUTIONS

L3608

THE MOST RUGGED, RELIABLE TRUCK VIBRATORS ON THE MARKET.

Cougar® • The pioneer in truck vibrators since 1964.

Adding a Cougar® Truck Vibrator not only saves you money on costly repairs to your trucks, it increases productivity by eliminating carryback. Cougar® Truck Vibrators give you more payload per cycle and fewer cycles per job. Fewer cycles lower labor and fuel costs and decrease vehicle wear. Material is evenly distributed during spreading. Cougar® Truck Vibrators eliminate bed cleanout time and the need for workers to climb into the truck beds to manually remove material, resulting in lower worker compensation claims.

THE PIONEER IN TRUCK VIBRATORS

Cougar Vibration patented the world's first 12-volt truck vibrator in 1964 and has steadfastly remained focused on industrial vibration. Cougar has since become a name synonymous with exceptional quality products, workmanship, and service support.

Martin Engineering purchased Cougar in 2010, making Martin the world leader in industrial vibration. Established in 1944, Martin is the primary international developer, manufacturer, and supplier of innovations to make the handling of bulk materials cleaner, safer and more productive.

ELECTRICS

DC-3200

Available in force pounds of 1100, 1600, 2500, 2700, and 3200

MDCV-700

MDC-400

SDC-100

Available in force pounds of 40, 100, and 200

The complete line of Cougar® 12/24 Volt DC Mobile Vibrators improves the speed and control of material flow from dump trucks and other self-powered heavy equipment.

Shielded, oversized, permanently-lubricated ball bearings assure exceptional service life

Sealed against dirt, dust, and water for long life in extreme conditions

Small size and light weight with high-speed, low-amp electric motors

Easy, low-cost installation

Rugged and durable

HYDRAULICS & PNEUMATICS

THD-2500, AP5-200, & ATU-43

THD-2500 / HYDRAULIC POWER / ROTATIONAL FORCE

High-strength aluminum housing for maximum durability in continuous-duty applications

Efficient motor designed for minimal power consumption with low noise output

Requires minimal maintenance

AP5-200 / PNEUMATIC POWER / LINEAR FORCE

Manifold/muffler for quiet operation

Optional air-cushioned, non-impacting action

Optional internal spring for positive starting

Universal mount - Replaces most 2" piston vibrators

ATU-43 / PNEUMATIC POWER / ROTATIONAL FORCE

Lower air consumption than comparable air vibrator

Excellent power-to-weight ratio

Low 62-78 dBA noise level is well below OSHA standards

Durable anodized aluminum finish provides a tough exterior

No lubrication required
