Dear Martin Engineering,

The CleanScape Scraper has been the most efficient and lowest maintenance scraper that has been used at our mine site, and that I have ever seen. We installed this scraper on a conveyor that gave us the biggest issues with carryback; we would have to work on the previous cleaner weekly to try to control the dust issues caused by the carryback. After we installed the CleanScape, our dust and carryback issues seem to stop.

We check the tension every month with our regular conveyor pm and only had to adjust the tension once after it was installed. I would recommend this scraper to everyone that has a trouble area with carryback in their work area.

Best Regards,

Brock Strachan
Maintenance Supervisor
